EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering CHENNAI INSTITUTE OF TECHNOLOGY ☑ CGPA - 8.40	2024 – 2028
Class 12th : 89% Velammal Vidyalaya	2023 – 2024

PROFESSIONAL EXPERIENCE

KaizenSpark Tech Pvt Ltd ☑ <i>AI Engineering Intern</i> - Engineered and deployed AI-powered features into live products, owning the full pipeline from prompt design to API integration and production rollout, collaborating cross-functionally with product and engineering teams. - Contributed to code reviews, iterative delivery cycles, and continuous improvement of production AI systems in an agile environment.	05/2026 – Present chennai, Tamil nadu
Flextronics ☑ <i>Enterprise Integration Services Intern</i> - Assisted in building and managing AI-powered integration workflows within Enterprise Integration Services, supporting end-to-end B2B data exchange and Salesforce CRM pipeline optimization using AI-assisted tools. - Built interactive Tableau dashboards transforming raw business data into structured visual insights, leveraging AI tools for data interpretation and presentation refinement.	11/2025 – 12/2025 chennai , Tamil Nadu

PROJECTS

RAG Arena : Benchmarking Traditional, Hybrid, PageIndex, Graph and Agentic RAG ☑ <i>TECH : Python, LangChain, LangGraph, Groq, Qdrant, BM25, Neo4j, RAGAS, FastAPI, React</i> - An benchmarking platform comparing Traditional, Hybrid, PageIndex, Graph, and Agentic RAG pipelines across shared datasets and evaluation workloads. - Implemented hierarchical retrieval, graph-based knowledge navigation, and agent-driven routing strategies to improve context selection and multi-hop reasoning. - Built an automated evaluation framework using RAGAS to measure faithfulness, answer relevancy, retrieval effectiveness, latency, and end-to-end system performance.
QueryMind : System aware Database management Agentic System <i>TECH : Python, FastAPI, LangChain, n8n , LLaMA , SQLAlchemy, MySQL, React, TailwindCSS</i> - Built an agentic LLM-based system to convert natural language queries into validated SQL using LangChain and LLaMA, enabling real-time interaction with structured databases. - Implemented schema aware filtering, alias mapping, and a validation pipeline for write operations to ensure accuracy and data integrity. - Reduced token usage by ~60% through structured prompt design and context pruning, improving response efficiency and reducing computational overhead.
SupportOrchestrator : LLM Fine-Tuned on Customer Support Tickets ☑ <i>TECH : Python, QLoRA, Llama-3.2-1B, Unsloth, ChromaDB, FastAPI, React</i> - Fine-tuned a 4-bit quantized LLM using QLoRA for structured customer-ticket intent and priority classification. - Built a semantic dataset-cleaning pipeline using Sentence Transformers, embedding clustering, and hybrid filtering. - Designed an intent-aware RAG workflow that maps support tickets into schema-aligned JSON for automated routing and policy retrieval.
AAC Tamil Next Word Prediction ☑ <i>TECH : Python, TensorFlow (Keras), Bi-GRU, LSTM and BiLSTM, NLP, IndicNLP, NumPy, Streamlit</i> - Built a Tamil next-word prediction system using Bi-LSTM and Bi-GRU models along with GloVe embeddings, addressing sequential dependencies and enabling context-aware language generation for assistive communication. - Implemented a bridge-based Tamil-English-Tamil pipeline to handle low-resource constraints, achieving 79% top-3 and 86% top-5 prediction accuracy.

SKILLS

Programming Languages: Python · Java · JavaScript · C / C++

Frameworks and Libraries: LangChain · LangGraph · PyTorch · TensorFlow · Scikit-learn · FastAPI · RAG · LoRA / QLoRA · Unsloth

AI Tools & Integrations: Mistral API · Hugging Face Inference API · LangSmith · ElevenLabs · Whisper · Ollama · vLLM · n8n · Flowise

Cloud/Database: AWS (S3 · Lambda · EC2) · Pinecone · ChromaDB · MySQL · MongoDB

Developer Tools: Google Colab · OpenCV · YOLO · Firebase

CERTIFICATES

- | | |
|---|-------------------------------------|
| • NPTEL - Introduction to IOT (scored 80%) | • AWS Cloud Practitioner Essentials |
| • Google Android Developer Virtual Internship | • MongoDB Basics for Students |
| • LinkedIn - DATASTRUCTURES IN JAVA | • Cisco-Intro to Data Science |

ACHEVEMENTS

Ranked 4th at HACK36, a national-level hackathon hosted by MNNIT Allahabad

WORLD COMPUTER HACKER LEAGUE - REGIONAL ROUND FINALIST

SOLVED 500+ QUESTIONS IN LEETCODE
